

Cross-cohort PA-vs-PE: Bruchovsky vs Shaw (real IADT trials)

CROSS-COHORT VALIDATION

Source: nicholasbruchovsky.com/dataTanaka.zip

Bruchovsky et al. (n=71):

- PE-AT50: 14%
- PA-AT50: 51%
- Disagree: 37%
- Sensitive: 35%

Shaw et al. (n=15):

- PE-AT50: 0%
- PA-AT50: 13%
- Disagree: 13%
- Sensitive: 7%

WP4 main empirical: cross-cohort consistency.
If both cohorts show comparable rates,
the methodology message is robust.
